SUMMARY

Hello, I'm a highly skilled front-end developer with a focus on React and its expansive ecosystem. I have a strong foundation in web development and I'm proficient in a wide range of technologies and frameworks.

In terms of React, I am well-versed in ReactJS, which is the popular JavaScript library for building user interfaces. I have extensive experience in developing responsive and interactive web applications using ReactJS. I can leverage its component-based architecture and state management to create dynamic and efficient UIs.

Additionally, I have expertise in working with various back-end technologies. I am proficient in NodeJS, which allows me to build server-side applications and APIs using JavaScript. I can develop scalable and performant applications by harnessing the power of NodeJS and its extensive package ecosystem.

I am also skilled in NestJS, a progressive NodeJS framework for building efficient and scalable server-side applications. NestJS utilizes TypeScript and follows a modular architecture, making it an excellent choice for enterprise-level projects.

Furthermore, I am experienced in NextJS, a React framework that enables server-side rendering, static site generation, and API routes. With NextJS, I can optimize the performance and SEO of web applications by rendering pages on the server.

In addition to my React expertise, I have a strong command of other technologies and languages. I am proficient in CSS, HTML, and have experience with popular CSS frameworks like Tailwind and Bootstrap. This allows me to create visually appealing and responsive user interfaces.

I am also knowledgeable in Java and have worked with the Spring Framework and Spring MVC, which are widely used in enterprise web application development. I have experience building RESTful APIs using Spring and implementing various design patterns.

Moreover, I have worked with databases such as PostgreSQL, MongoDB, and MySQL. I can design and optimize database schemas, write complex queries, and ensure efficient data retrieval and manipulation.

In terms of operating systems, I am comfortable working with Ubuntu, Linux, Mac OS, and Windows. This flexibility allows me to work across different environments and adapt to the needs of the project.

Furthermore, I have proficiency in C# and Windows Presentation Foundation (WPF), which enables me to develop desktop applications for the Windows platform.

Lastly, I have experience with FTP (File Transfer Protocol) for efficient file transfer and management.

In summary, as a front-end developer with a focus on React and a diverse skillset, I am well-equipped to tackle a wide range of projects. I have expertise in ReactJS, NodeJS, NestJS, NextJS, ExpressJS, Java, Spring Framework, Spring MVC, RESTful APIs, CSS, HTML, Tailwind, Bootstrap, Python, operating systems (Ubuntu, Linux, Mac OS, Windows), C#, WPF, FTP, and databases such as PostgreSQL, MongoDB, and MySQL. I am passionate about creating high-quality, user-friendly applications and I'm excited to contribute my skills to your projects.

EXPERIENCE

Front-End Developer
MITIT   **August 2021 - April 2023, Kyiv**

· Developed front-end application interfaces in HTML/CSS/JS with semantic approaches to promote consistent and accessible user experience; reduced page loading time by up to 65%.
· Utilized web APIs to query data from server, integrate into the front-end application and improve the underlying architecture; increased customer satisfaction by 17%.
· Optimized website performance and accessibility with Total Accessibility checks; created user-friendly experiences across all devices with cross-browser compatibility.
·

EDUCATION

Bachelor of Computer Science
MITIT · Kyiv · 2022

CERTIFICATIONS

CCNA
CISCO · 2022

COURSEWORK

Military Cyber Center Web Site for Armed Forces
MITIT · 2022 · ReactJS,NESTjs,postgresql,FTP-
server,ExpressJs,Sequelize,CSS,HTML,RESTful,CORS,JWT,Auth,TailwindCss,Flovbite
Stucture,optimisation, building, deployment
